DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3,4,6-12,15-17,19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Southwick (1909729). Figure 1 shows the opposing pairs of pistons 37, guide rails 28,30, flywheel 50, eccentric shaft 42, bearings 110. timing gear 63, exhaust valve 21, fuel valve 20, and slot 45.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

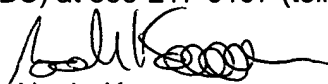

Claims 5, 13, 14, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Southwick as applied to claims 4, 12, and 18 above, and further in view of Albertson (3517652). Southwick does not teach the use of a flywheel. Albertson discloses a slot 98 on the crankshaft for securing a flywheel that will smooth out rotational fluctuations; therefore, to do likewise in Southwick would have been obvious to one of ordinary skill in the art.
